PROFESSIONAL SUMMARY

Results-driven Associate Product Manager, QA Engineer, and Software Developer with 4+ years of experience across cybersecurity, cloud platforms, health information systems, and full-stack development. Proven ability to lead cross-functional teams, manage product lifecycles, and deliver secure, scalable digital solutions. Experienced with payment systems (M-Pesa/Daraja API), POS platforms, and OpenMRS health data systems. Passionate about building impactful technology that addresses real-world challenges across Africa and beyond.

EXPERIENCE

Associate Project Manager | **Pagamio (South Africa, Remote)** *Oct 2025 – Present*

- Defined and prioritized product roadmaps for Pagamio's VAS and Commerce platforms, translating business objectives into actionable development sprints.
- Identified workflow inefficiencies and user experience gaps, providing product-level insights that directly influenced feature development and system design decisions.
- Documented comprehensive user journeys in Confluence to streamline vendor and admin onboarding across POS modules.
- Collaborated cross-functionally with developers and leadership to triage and prioritize critical bugs, improving platform reliability, scalability, and usability.
- Drove alignment between QA findings and product strategy, ensuring feature logic consistency across the full product lifecycle.

QA Tester (Full-Time) | **Pagamio (South Africa, Remote)** *Jul 2025 – Present*

- Led end-to-end functional testing of Pagamio's VAS and Commerce platforms, identifying frontend/backend defects using Chrome DevTools (network analysis, payload inspection, API response validation).
- Authored detailed Jira tickets with clear reproduction steps, expected vs. actual results, and technical context to accelerate developer resolution.
- Conducted transaction flow testing across POS modules including product selection, charging, payment processing, merchant setup, and inventory flows.
- Validated API request/response behavior; identified issues such as missing payloads, failed requests, and broken UI redirects.
- Tested mobile POS data optimization performance using emulator-based simulations.

QA & Frontend Developer Intern | **Pagamio (South Africa, Remote)** *May 2025 – Jul 2025*

- Conducted QA testing for web and mobile applications, ensuring functionality, usability, and performance across key product flows.
- Reported and documented bugs in Jira, working closely with developers to resolve them efficiently.
- Contributed to mobile (Flutter) and web (React.js) development features to improve system performance and user experience.

IT Attachée | **Central Rift Valley Water Works Development Agency (Nakuru)** *May 2025 – Aug 2025*

- Provided technical support within the ICT department, including hardware, software, and desktop management.
- Assisted with troubleshooting, system maintenance, and end-user support across various offices.
- Gained hands-on exposure to enterprise IT operations and infrastructure support in a government utility context.

Google Developer Groups – Student Lead Organizer | **Maseno University** 2024 – 2026

- Led the Google Developer Club on campus, organizing tech events, hackathons, and developer community initiatives.
- Coordinated with students and industry professionals to build a thriving tech ecosystem within the university.
- Fostered peer-to-peer learning and mentorship for aspiring developers across disciplines.

Software Developer Intern | **University of San Francisco, California** May 2024 – Aug 2024

- Improved the functionality of OpenMRS for HIV surveillance and prevention at the University's HIV Prevention and Surveillance Center.
- Designed and optimized data collection and reporting modules contributing to better healthcare delivery and decision-making.
- Integrated new features while maintaining healthcare data security standards and writing secure code to protect sensitive health data.

Cybersecurity Trainee | **CyberSafe Foundation (Nigeria)** 2024

- Acquired structured foundational knowledge in cybersecurity through training and hands-on projects alongside 600+ African women.
- Focused on endpoint security, network configuration, and methods of protecting data at scale.

Flutter Student Lead | **Google Developer Student Clubs (GDSC)** 2023 – 2024

- Led workshops on developing secure mobile applications and best practices in cloud security.
- Mentored students to build scalable, secure applications using Flutter and cloud platforms including AWS.

Frontend Developer Intern | **Safiri Digital Cabs** Apr 2022 – Jun 2022

- Developed interactive and responsive web interfaces using React.js, optimizing performance and scalability.
- Collaborated with designers and back-end developers to deliver cohesive, high-quality products end-to-end.

UI Designer | **Reggy Cudas** Mar 2022 – Jul 2023

- Designed intuitive mobile and web interfaces, assisting in developing a Point-of-Sale application incorporating user feedback.
- Worked alongside developers to ensure tight alignment between design and development objectives.

EDUCATION

Bachelor of Science in Information Technology | **Maseno University** 2026

PROJECTS

DadaFlow – Transparent Donation & Distribution Platform | **Final Year Project** 2025– 2026

- Designed and developed a web-based platform addressing period poverty in Kenyan schools, enabling transparent donation and structured distribution of menstrual hygiene products.
- Built a role-based system for donors, teachers, and administrators with real-time transparency dashboards and privacy-preserving beneficiary tracking using anonymous student IDs.
- Integrated M-Pesa (Daraja API) for secure mobile payments; implemented a three-tier architecture using React.js, Node.js (Express), and PostgreSQL.
- Conducted requirements analysis, system design (ERD, DFD, API specs), and pilot planning — aligned with SDGs 4 and 5.

OpenMRS Improvement for HIV Surveillance | **University of San Francisco California** 2024

- Extended OpenMRS functionality for the HIV Prevention and Surveillance Center, enhancing data collection and reporting while maintaining healthcare data protection standards.

Cloud Security Implementation | **University Project** 2024

- Designed and implemented a secure cloud infrastructure using AWS, applying security best practices including data masking, encryption, and access controls.

RFID Attendance System | University Project 2024

- Built a radio-frequency identification-based attendance system ensuring data integrity, confidentiality, and fast, reliable record-keeping.

- Introduction to Cybersecurity

SKILLS

Product & PM

Jira • Confluence
Roadmapping
Sprint Planning
User Story Writing

Cybersecurity

Endpoint Security
Network Config (TCP/IP)
Data Masking &
Encryption
AWS • Azure

QA & Testing

Functional & Regression
API Testing (DevTools)
Bug Reporting (Jira)
Emulator Testing

Development

React.js • Flutter •
Node.js
Python • JavaScript •
Java
PostgreSQL • PHP •
OpenMRS
M-Pesa API • Git • Agile

INTERESTS

Cloud Security • Cybersecurity Awareness • Health Information Systems • FinTech & Payment Systems • Open-Source Contribution • Resilient System Building
