Objective

Proactive Cloud Security Specialist and Software Developer experienced in cybersecurity, cloud platforms, and health information systems, dedicated to using technical expertise and knowledge to solve real problems, secure critical systems, and meaningfully contribute to impactful projects, including cloud security and healthcare IT.

Experience

Software Developer Intern | University of San Francisco, California

May 2024 - August 2024

- Improved the functionality of OpenMRS for HIV surveillance and prevention at the University's HIV Prevention and Surveillance Center.
- Designed and optimized data collection and reporting modules for better healthcare delivery and decision-making.
- Integrated new features into the system while maintaining healthcare data security standards.
- Cross-functional collaboration by writing secure code that protects sensitive health data.

Cybersecurity Trainee | CyberSafe Foundation

2024

- Acquired structured foundational knowledge and skills in cybersecurity through training and hands-on projects.
- Collaborated on cybersecurity projects with a class of over 600 African women, showcasing teamwork and problem-solving skills.
- Focus on endpoint security, network configuration, and methods of protecting data.

Student Lead | Google Developer Student Clubs (GDSC)

2023-Present

- Led workshops on developing secure mobile applications and best practices in cloud security.
- Mentored students to develop scalable and secure applications using Flutter and cloud platforms like AWS.
- Championed community initiatives to create better opportunities for secure coding and developing innovative solutions.

Frontend Developer | Safiri Digital Cabs

Apr 2022 - June 2022

- Developed interactive and responsive web interfaces using React.js.
- Optimized application performance to enhance users' satisfaction and scalability.
- Collaborated with designers and back-end developers in the development of end-to-end cohesive, high-quality products.

UI Designer | Reggy Cudas

Mar 2022 - Jul 2023

- Designed intuitive and visually appealing mobile and web interfaces tailored to user needs.
- Assisted with developing a Point-of-Sale application by incorporating user feedback into the development process.
- Working alongside developers to ensure design and development are better aligned.

Education

Maseno University

2021-2026

Bachelor's Degree in Information Technology

Certifications

- CCNA 1
- Endpoint Security
- Networking Devices and Initial Configuration
- Introduction to Cybersecurity

Skills

- Cloud Security: AWS, Azure
- Health Information Systems: OpenMRS Development
- Front-End Development: React.js, Flutter, HTML, CSS, JS
- Programming: Flutter, JavaScript
- Tools: Git, Agile, VS Code, Figma
- Security Concepts: Data Masking, Encryption, Endpoint Protection
- Networking: TCP/IP, Subnetting, Firewalls

Projects

OpenMRS Improvement for HIV Surveillance

- Worked with the HIV Prevention and Surveillance Center, University of San Francisco, to extend the functionality of OpenMRS.
- Enhanced data collection and reporting while ensuring that set health care data protection standards were met.

Implementation of Cloud Security

- Designed and implemented a secure cloud infrastructure using AWS Cloud in a university project.

RFID Attendance System

- Radio-frequency identification-based attendance system that was secure, fast, integrity of data was maintained, and data confidentiality was ensured.

Interests

- Cloud Security
- Cybersecurity Awareness

- Mobile programming
- Research
- Product Management
- Health Information Systems
- Resilient System Building
- Continuous Learning
